AccessScan — Accessibility Report (WCAG 2.2)

Engine: axe-core 4.10
View: After

58 / 100   Completed in 2.6 s • Generated: 29 Aug 2025, 09:30 (Europe/London)
Trend: 7 fewer issues (Before -> After: 12 -> 5).

Automatable (tools)

5   Quick wins you can copy-paste.

Remaining after pass (machine-tests)

7   Items still present after this pass.

Checks are automated where objective; we link WCAG 2.2 for each item and show concise fixes. Conformance always requires human judgement.

Serious issues

Issue	WCAG	Selector	How to fix (code)
Images without alt	1.1.1	`img.hero`	`Confirm alt text (or empty alt for decorative).`
Form inputs unlabeled	3.3.2	`input[type="email"]`	`<label for="email">Email</label> <input id="email" name="email" type="email" />`
Form inputs unlabeled	3.3.2	`input[type="search"]`	`<label for="email">Email</label> <input id="email" name="email" type="email" />`

Moderate issues

Issue	WCAG	Selector	How to fix (code)
Link purpose in context	2.4.4	`a:contains("Read more"), .icon`	`Link purpose in context`
Focus order	2.4.3	`header > nav > a, main h1, .cta`	`Focus order`

Human checks (2)

- Link purpose in context

  Each link makes sense from surrounding text. Replace "Click here"/"Read more" with descriptive text or add off-screen context for repeated links.

- Focus order

  Tab/read order matches the visual order. When modals or menus open, focus moves into them; on close, focus returns to the trigger.
